Preface

This online book is a compilation of resources aimed at advancing quantitative social science in Singapore. It is meant to be a 'living document', so it will be updated as frequently as possible. The main goal is to promote interest and rigour in quantitative social science on Singapore. It does so by:

- 1. **Providing information on Singapore-relevant datasets** that are currently used to answer research and policy questions (Chapter 1 and Chapter 2). This includes:
 - Descriptions of *publicly available* datasets and how to access them. This overview of the 'data landscape' will be helpful for social scientists to get started with research on Singapore, and prevent wasteful overlap in primary data collection across institutions.
 - A list of restricted or non-publicly available datasets that could be used to answer important research or policy questions if access was granted. If available, details on the dataset and reasons for data restriction will also be listed. It is hoped that this list will promote greater transparency in data sharing across research teams.
- 2. Maintaining a repository of replicable case studies on Singapore society (with annotated code, where possible) which can be used for illustrations in any quantitatively oriented college-level class (Chapter 3 to Chapter 6). These may be short summaries (blog-length) of published work, or side analyses that may not be appropriate for an academic journal but are useful for Singapore social science nonetheless.
- 3. Occasional think pieces by researchers on best practices and on how to improve quantitative social science in Singapore (Chapter 7).

About me

The purpose of this book

Part I Singapore Datasets

Public Data

List of public data

Restricted Data

List of restricted data

Part II Case Studies

Race

This is a section on race

3.1 Witty title for Case 1

This is an example of in-line code annotation and output.

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

Figures can be referenced, e.g., see Figure 3.1. Similarly, you can reference tables generated from knitr::kable(), e.g., see Table 3.1.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```

You can write citations, too. For example, we are using the **bookdown** package (Xie, 2018) in this sample book, which was built on top of R Markdown and **knitr** (Xie, 2015).

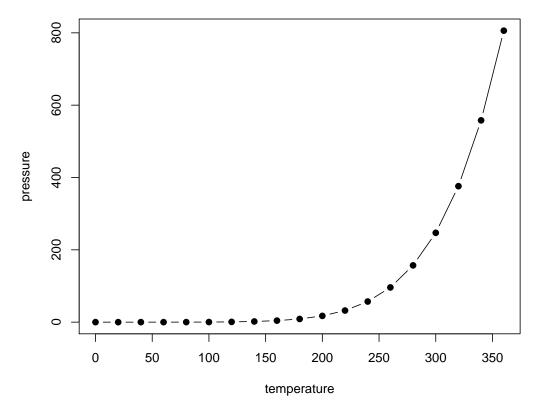

Figure 3.1: Here is a nice figure!

Table 3.1: Here is a nice table!					
Sepal.Length	Sepal.Width	Petal.Length	Petal.Width	Species	
5.1	3.5	1.4	0.2	setosa	
4.9	3.0	1.4	0.2	setosa	
4.7	3.2	1.3	0.2	setosa	
4.6	3.1	1.5	0.2	setosa	
5.0	3.6	1.4	0.2	setosa	
5.4	3.9	1.7	0.4	setosa	
4.6	3.4	1.4	0.3	setosa	
5.0	3.4	1.5	0.2	setosa	
4.4	2.9	1.4	0.2	setosa	
4.9	3.1	1.5	0.1	setosa	
5.4	3.7	1.5	0.2	setosa	
4.8	3.4	1.6	0.2	setosa	
4.8	3.0	1.4	0.1	setosa	
4.3	3.0	1.1	0.1	setosa	
5.8	4.0	1.2	0.2	setosa	
5.7	4.4	1.5	0.4	setosa	
5.4	3.9	1.3	0.4	setosa	
5.1	3.5	1.4	0.3	setosa	
5.7	3.8	1.7	0.3	setosa	
5.1	3.8	1.5	0.3	setosa	

Gender

Gender sections

- 4.1 Example one
- 4.2 Example two

Class / SES

Class section.

- 5.1 Example one
- 5.2 Example two

Life Course

Life course sections

Part III Think Pieces

Thinking about Numbers

Think pieces section

7.1 Think piece 1
